of mobile device you use with the App, its unique use ID, IP address, and operating system, and the type of mobile Internet browsers in use

- Information about the location of your device, including geo-location information

IBM may use the information collected through this App in the following ways:

- To review the quality and improve the functionality of the App
- To better improve the way the App works with your device
- To create new Apps
- To provide anonymized user analytics and industry benchmarking
- To share anonymized data with third parties

Provided that this information is not required to be retained pursuant to judicial proceeding, court order, or legal process, this information will be deleted when it is no longer needed to provide the services associated with the App, unless it has been anonymized and does not longer contained personally identifiable information.
